Professional Summary

Computer Science undergraduate with hands-on experience in Python, SQL, Pandas, FastAPI, and AWS. Built data pipelines processing 10,000+ records, automated repetitive data workflows, and worked with structured and semi-structured data for cleaning, transformation, and analysis. Comfortable solving problems programmatically across data processing, APIs, and backend request data. Targeting Data Engineer Intern roles.

Technical Skills

- **Programming Languages:** Python, SQL, Bash
- **Data Processing:** Pandas, NumPy, Data Cleaning, Data Wrangling, Data Transformation, Data Normalization, Exploratory Data Analysis (EDA), Feature Engineering
- **Data Engineering / APIs:** Data Pipelines, Automation, FastAPI, HTTP Basics, JSON, CSV, Backend Request Data
- **Databases:** MySQL, MongoDB
- **Visualization:** Streamlit, Tableau, Power BI, Excel, Matplotlib, Seaborn, Plotly
- **Machine Learning:** Scikit-Learn, Isolation Forest, Anomaly Detection
- **Cloud:** AWS
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Linux

Projects

Data Anonymization System for Financial Datasets

Jun 2025 – Nov 2025

Python, Pandas, Streamlit, Scikit-Learn, K-Anonymity, L-Diversity, Data Privacy

- Built a Python-based data processing pipeline for 10,000+ financial records, applying K-Anonymity (K=10) and L-Diversity (L=2) to protect sensitive fields.
- Automated anonymization workflows using Python and Pandas, reducing manual effort by 80% while retaining 90%+ statistical utility for downstream analysis.
- Developed an interactive Streamlit dashboard with CSV upload and export functionality, reducing dataset processing time from several minutes to under 30 seconds.

OLA Ride Bookings Analytics

2025

Power BI, SQL, DAX, Power Query, Excel

- Built a five-page Power BI dashboard analyzing 100,000+ ride bookings using DAX measures to monitor cancellation rate, revenue, booking trends, and vehicle performance.
- Designed a star-schema data model using Power Query, standardizing 100,000+ records across vehicle type, payment method, and cancellation reason fields.
- Wrote SQL queries using aggregations, window functions, CTEs, and views to validate dashboard KPIs, including customer rankings and cancellation analysis.

Zero Trust Secure API Gateway with Attack Detection

Feb 2025 – Present

Python, FastAPI, Scikit-Learn, SQL, Isolation Forest

- Built a FastAPI-based system to process backend request data and support real-time threat analysis.
- Queried and structured request data using SQL for detection logic and pattern analysis.
- Trained an Isolation Forest model in Scikit-Learn to detect abnormal API traffic patterns, including SQL injection, XSS, and brute-force attempts.
- Built a dashboard to visualize traffic and threat data for technical and non-technical users.

Leadership & Activities

Technical Lead, Organizing Committee

Mar 2024 – Present

RVITM, Bengaluru

- Coordinated a cross-functional team across design and technical operations for 10+ college events, each with 500+ attendees.
- Managed end-to-end execution and real-time problem-solving under live-event pressure with zero technical failures across major fests.

Captain, Football Team

Jun 2025 – Present

RVITM, Bengaluru

- Led the college football team across 2 inter-college tournaments, advancing to the semi-finals in both.

Education

Bachelor of Engineering, Computer Science & Engineering

Aug 2023 – Jun 2027

RV Institute of Technology and Management (RVITM), Bengaluru

CGPA: 8.34 / 10

Pre-University Education, Physics, Chemistry, Mathematics

May 2021 – Mar 2023

KLE Independent PU College, Belgaum

87%

Certifications

Deloitte Australia – Data Analytics Job Simulation (Forage) | Tata Group – Data Visualization: Empowering Business with Effective Insights (Forage) | NPTEL – Python for Data Science
